

# Bohemian Weave Bracelet

## Supplies:

40 to 50 Orings 15mm Avocado  
80 to 100 Orings 7.25mm Blueberry  
80 to 100 Jump rings 16gauge 1/4" orange

## Tools:

1 pr Long needle nose pliers  
2 pr Flat nose pliers

1. Before you start, open 1/2 of all jump rings and close 1/2 of all jump rings.

2. Use needle nose pliers to pull 15mm oring through one of the closed jump rings. Slide on second jump ring next to the first.

3. Use an open jump ring and hook it through both ends of the oring. Leave this open for now.

4. Use pliers to pull a second oring through the 2 existing closed jump rings. Just as with the first oring, use an open jump ring, hook it through both ends of oring and leave it open.

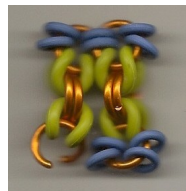

\*This is your first component, you can make 20-25 of these and have them ready to assemble together into the bracelet.

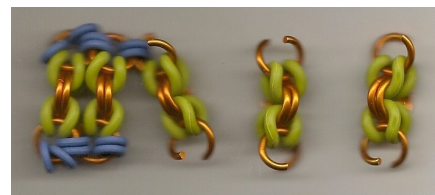

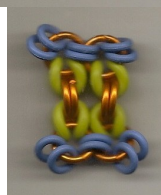

5. Place 4 orings 7.25mm onto the top open jump ring. Close the jump ring.

6. Take the top open jump ring of your second component and hook it into 2 orings from the previous component. Pick up 2 more orings and close the top jump ring on the second component.

7. Repeat steps 5 and 6 but on the bottom jump rings as you go. Continue adding components the same way.

8. To finish and close the end of the bracelet together, you will not need any 7.25mm orings. Just hook the top and bottom jump rings to the first and last 2 orings hanging off the top and bottom of each row.
