

# Center Spine Bracelet

## Supplies:

36 to 48 Orings 15mm (celestial blue)  
36 to 48 Orings 6mm (teal)  
54 to 72 Jump Rings 16g 1/4" (gold)  
36 to 48 Orings 7.25mm (bright kiwi)  
24" gossamer floss (elastic line)  
18 to 24 rhinestone spacers 6mm  
36 to 48 beads 4mm (pearls or crystals)

**Tools:** 1 pair Flat Nose Pliers  
1 pair curved needle nose pliers  
1 pair long needle nose pliers  
1 big eye needle

1. Use long needle nose pliers to pull 6mm oring onto 15mm oring. Place a 6mm oring onto the pliers then grab the 15mm oring with the pliers. Repeat this so that you have 2.

2. Open 1 16g 1/4" jump ring. Fold each of the 2 pieces in half from step one and push them onto the jump ring. Close jump ring.

3. Repeat step 1 and 2 until you have 18 to 24 pieces.

4. Open 1 16g 1/4" jump ring. Push jump ring through one of the folded orings in the first piece and then push the jump ring through one of the folded orings in a second piece. This step links the two pieces together on one side. Pick up 2 orings 7.25mm on the jump ring. Close jump ring.

5. Repeat step 4 using a jump ring to connect the pieces at the top (pass jump ring through the folded orings). Pass the jump ring through the 2 orings 7.25mm that you picked up in step 4. Close jump ring.

6. Repeat steps 4 and 5 using jump rings on the top and bottom to connect additional pieces. Each top and bottom jump ring will always share a pair of 7.25mm orings in the center.

7. Connect the beginning and ending piece in the same pattern (a jump ring at top and bottom with a pair of 7.25mm orings in the middle).

This completes the chain maille portion of the piece. You can wear bracelet as is or move to step 8.

8. String a 24" length of gossamer thread (this is elastic) onto a big eye needle.

9. Pass needle through 1 pr of 7.25mm orings. Pick up 1 bead 4mm, 1 rhinestone spacer 6mm and 1 bead 4mm. Pass needle through the next set of 7.25mm orings.

10. Continue picking up 4mm bead, 6mm spacer and 4mm bead between all pairs of 7.25mm orings until complete. Knot thread several times to finish. Apply glue to knots if desired.
